University of Minnesota Postdoctoral Position

A postdoctoral position is available in the group of Prof. Romero-Vargas Castrillón at the University of Minnesota. The postdoctoral associate will investigate the interactions between bacterial cells and nanostructured interfaces using surface analytical techniques. Our recent publications in this area can be found in the group’s website: epclab.umn.edu.

The successful candidate will have a recent Ph.D. in environmental engineering, materials science & engineering, chemical engineering, or a related field. A strong background in nanomaterials synthesis and characterization is required. Experience with AFM and microbiological training is a plus.

Applicants must submit a CV including a list of peer-reviewed publications, the contact information of 3 references, and a letter describing how the applicant’s background and qualifications are related to the advertised position. Applications should be sent via email to Prof. Romero-Vargas Castrillón at sromerov@umn.edu.

Qualified candidates will be contacted to schedule a follow-up phone interview. Applications will be accepted until the position is filled. The position is available immediately.
