Oberlin College

Position Available:
SUSTAINABLE TECHNOLOGY COORDINATOR, OBERLIN COLLEGE

Oberlin College invites applications for the position of Sustainable Technology Coordinator. The successful candidate will assist in the integration, development, and management of a campus-wide building energy operation system. In addition, the successful candidate will assist in the further development and management of “Environmental Dashboard,” a novel technological system that provides community residents college students, staff, and faculty with environmentally and socially contextualized real-time feedback on energy and water flows and environmental conditions through residential and commercial buildings and through cities.

More information on the project can be found at: www.oberlindashboard.org. We seek a recent college graduate (or equivalent experience) with strong knowledge of computer systems and building energy management. We seek an individual with strong leadership and excellent organizational skills who is excited by the opportunity to develop and manage novel technology designed to motivate and empower citizens, students, staff, and facility operators to be smart users of energy and to take better care of the environment.

Applications will be considered immediately until the position is filled. A full description and instructions for application are posted at: SustainableTechnology Coordinator.
