Environmental Engineering Faculty Position  
U.A. Whitaker College of Engineering  
Florida Gulf Coast University, Fort Myers, Florida

The Department of Environmental and Civil Engineering in the U.A. Whitaker School of Engineering at Florida Gulf Coast University has an opening for an Environmental Engineering faculty member at the Assistant Professor level. Located in the beautiful, mid-sized city of Fort Myers, Florida Gulf Coast University (FGCU) is a public, comprehensive university offering a wide range of undergraduate and selected graduate degree programs. Opened in the fall of 1997, FGCU is in the enviable position of having all new facilities that have been especially designed and built for a campus of the 21st century. Technology and distance learning complement the traditional campus setting, giving students a variety of delivery mode options. With an excellent climate, magnificent beaches, and superb natural resources, the area also offers a very high quality of life. Money magazine recently ranked Ft. Myers–Cape Coral as one of the “best places to live in America.”

MINIMUM QUALIFICATIONS: An earned Doctorate from a regionally accredited institution in environmental or civil engineering or a closely related field of engineering. Professional registration or licensing or the ability to become registered is required.

PREFERRED QUALIFICATIONS: Preferred areas of expertise include sustainable water and wastewater treatment technologies including resource recovery and water treatment with special focus on desalination. A rank-appropriate record of educational and/or scientific publication in scholarly journals and/or industrial experience (pertinent to one or more of the areas of interest listed above) is desirable. Successful candidates must be able to teach new and/or existing courses in environmental engineering as well as in general engineering topics. Candidates should possess skills for working in a rapidly developing regional comprehensive university with a focus on creating an effective student learning environment among diverse academic disciplines.

BRIEF DESCRIPTION OF DUTIES: The U.A. Whitaker College of Engineering is dedicated to quality education, scholarship, and service. All faculty are expected to be excellent teachers who are committed to innovative delivery of instruction that results in improved student learning; to using technology, including distance learning, effectively; to engage in scholarly and service activities; and to engage in a continuous and outcomes-based assessment process. Environmental engineering faculty will be responsible for teaching appropriate, assigned undergraduate and graduate engineering courses, including discipline-specific environmental engineering courses. Appointment will be on a 9-month multi-year basis with a preferred starting date of August 2015.

KNOWLEDGE, SKILLS, AND ABILITIES: Ability to deal effectively with a diverse range of learners and to use information technology as a pedagogical and professional tool. Interest in collaborating both within and outside of the University in the development and delivery of instruction. A commitment to collaborate with other faculty to develop a shared vision of the future.

HOW TO APPLY: Please visit our Self-Managed Online Application Resource (SOAR) at http://jobs.fgcu.edu for posting details, EEO/AA policies, and application instructions. Only applications entered into SOAR will be accepted. Persons with disabilities needing an accommodation to participate in the application/selection process should contact the Director of Human Resources at (239) 590-1400 or TTY (239) 590-1450, a minimum of 5 working days in advance of the application deadline. APPLICATION DEADLINE: November 15, 2014. QUESTIONS? Please contact Dr. Simeon Komisar, skomisar@fgcu.edu, Environmental Engineering Program Director, Department of Environmental and Civil Engineering, Florida Gulf Coast University.
