Faculty Position in the Civil & Environmental Engineering Department at the University of Wisconsin-Madison

The University of Wisconsin-Madison is searching for a faculty member to complement the faculty in Civil and Environmental Engineering (http://www.engr.wisc.edu/cee.html). We seek exceptional candidates with primary research interests in water engineering in the built environment, hydrologic modeling, water management, advanced water treatment, novel biotechnologies for environmental sustainability, or environmental process engineering. This is a full-time tenure-track position at the Assistant Professor rank. Applicants are expected to develop innovative and internationally recognized research programs, contribute to scholarly work in Civil and Environmental Engineering, undertake instruction in undergraduate and graduate classes, and engage in professional service. The successful candidate is expected to develop interactions with other faculty, including those within the College of Engineering, and other colleges at the University of Wisconsin-Madison. Applications should include a curriculum vitae, a research statement, a teaching statement, and the names and contact information for three references. The University of Wisconsin-Madison Madison is an equal opportunity/affirmative action employer that promotes excellence through diversity and encourages all qualified individuals to apply. Unless confidentiality is requested in writing, information regarding the applicants must be released upon request. The application deadline is November 30, 2014 although applications may be considered until the position is filled. Applications should be submitted electronically at https://www.aims.wisc.edu/jobapply. Additional information about the CEE department and the position can be found at http://www.engr.wisc.edu/cee.html.
