Call for Nominations and Applications
2018-2019 IEMS Visiting Professor of Instruction

The Department of Industrial Engineering and Management Sciences (IEMS) at Northwestern University invites applications for our Visiting Professor of Instructor Program. Visiting Professors will be experienced faculty who wish to spend a year with IEMS teaching undergraduate courses and interacting with top-quality researchers in the department. We expect that the exchange of ideas and best practices will benefit both IEMS and the Visiting Professor.

Northwestern IEMS boasts a top-five PhD program, as well as a top-ten undergraduate program, and its faculty are respected worldwide for their leadership in a number of research areas. Visiting Professors will be invited to collaborate in research with current faculty while supporting the undergraduate program by teaching foundational courses and advising senior design projects. Opportunities to teach special topics courses or to develop new courses that can serve both the Northwestern population and the Resident’s home institution are welcomed. The Department is also interested in co-curricular activities (such as undergraduate research, workshops, seminars, competitions, or similar events) that offer the opportunity for Northwestern students and students from the home institution to collaborate.

The successful candidate for the Visiting Professor of Instructor program will typically be a tenured faculty member on sabbatical from his or her home institution for the 2018-2019 academic year, with demonstrated excellence in teaching and an interest in the assessment and improvement of student learning. Visiting Professor of Instructor stipends will be commensurate with experience, and the teaching load will be negotiated based on the ideas and opportunities proposed by the candidate. Visiting Professors of Instructor will also be provided a discretionary account that can be used for travel, support of undergraduate research assistants, and other professional expenses.

Applications should be submitted electronically to http://www.mccormick.northwestern.edu/industrial/career/ and should include

• Cover letter and CV
• Statement of purpose, including description of courses the candidate is particularly interested in teaching or developing, as well as proposal for any co-curricular opportunities the candidate wishes to pursue
• Statement of teaching philosophy
• Teaching evaluations for at least the last four years
• List of references familiar with the candidate’s experience and interest in teaching and learning.

Questions may be directed to tir@iems.northwestern.edu.

To ensure full consideration please submit an application by December 15, 2017. Applications will be accepted until the position is filled. Northwestern University is an Equal Opportunity, Affirmative Action Employer of all protected classes including veterans and individuals with disabilities. Women and minorities are encouraged to apply. Hiring is contingent upon eligibility to work in the United States.
