✓ many ways to supplement your degree with other opportunities at NU

iPad Air 2 giveaway | food will be provided | bring resumes to network

All declared and prospective IEs are invited

The speakers for this year’s panel are...

Molly Kelly, Global Director Professional Services, Data Masons. Molly oversees the implementation, ongoing consulting and support services delivered to clients. Data Masons’ clients are typically large distribution and manufacturing organizations with complex EDI needs. Prior to joining Data Masons, Molly owned and managed an ERP consulting firm which was purchased by Exact Software, based in the Netherlands, where she then served as General Manager for the Americas. Molly also led the Business Development team at BT Partners, a technology services division of a large regional accounting firm. She received a BS from IEMS and holds MCP, MCSE, MCDBA, ISO Auditor certifications.

George Lannert, recently retired President & CEO, Powervar, Inc. Powervar is manufacturer of electrical power supplies widely used in medical instruments and retail point of sale systems. He and his team grew the business from $6M in annual sales to over $70M, eventually selling the company to a large multinational. Prior to Powervar, he headed a division of Illinois Tool Works in the telecommunications industry and also worked in the U.S. and abroad for Motorola and as a general management consultant for Cresap, McCormick and Paget. He received his BSIE and an MBA, both from Northwestern University.

Carley Kauble, Product Manager, Asurion. Asurion is a technology company providing protection and support solutions for major wireless carriers, cable providers and retailers. In her current role, she is responsible for driving the product growth roadmap for a major wireless carrier. Prior to Asurion she spent 9 years with Rockwell Automation as a simulation consultant, sales account manager and a product manager. She received a BS in IE and MEM from Northwestern.

Tom Brody, Environmental Systems Engineer in the Resources Management Division, U.S. EPA Region 5 Chicago office. His interests are in the areas of planning, design, development, and implementation of Geographic Information Systems. Recent publications of note examine critical ecosystems in the Midwest as well as threats, vulnerabilities, and management of crude oil spills at the subwatershed level. He also recently became the Quality Assurance Manager for his Division. Before joining the EPA, Tom served as a laboratory/graduate participant at Argonne National Laboratory. He received a PhD in IEMS from Northwestern University in 1998.

Craig Asher, principal, Vital Venture Capital LLC. Vital Venture Capital is a venture capital group investing in life sciences platforms and business-to-business software. Before Vital he was a product manager at three software startups—one in e-commerce that went public; one that he helped grow from near-death to a category leader that was purchased by IBM; and a third within IBM that is now a key part of the IBM Smarter Planet initiative. Before working in software, Craig was a consultant for retailers, distributors, and manufacturers in the supply chain strategy group at Andersen Consulting (now Accenture). He has two degrees from Northwestern: an MS from IEMS and an MM from Kellogg.

Rajesh C. Oza, specializes in helping senior executives better align their organizations to achieve success. Simply put, he facilitates alignment of strategy and organization through a systems approach to client viability. Client viability includes change management, executive coaching, strategic planning, organizational design, culture and leadership development, double-loop communication & learning, high-performance teaming, stakeholder transition, roadmap implementation, M&A integration. Rajesh received an MS from IEMS and a PhD in Organization Change from Pepperdine. As well, he facilitates T-Groups for MBA students at Stanford’s Graduate School of Business.
