Courses that Count Towards Majors and Minors in the IEMS PhD Requirements

The following areas can be chosen as majors or minors in the IEMS PhD course requirements.

- Analytics
- Applied Statistics & Quality Engineering
- Decision and Risk Analysis
- Financial Engineering
- Healthcare Engineering & Decision Sciences
- Optimization
- Organization Theory & Systems Analysis
- Production & Logistics
- Stochastic Modeling and Analysis

In general, any two courses in an area fulfill a minor, and any four courses in an area fulfill a major. The exceptions are that there is no major in Analytics (only a minor), and the rules for Healthcare Engineering & Decision Sciences are more complicated (as explained below).

Some courses belong to multiple areas, but courses cannot be counted towards multiple areas at the same time in a student’s degree plan. Each course taken can be counted only once towards fulfilling the degree requirements.

Courses may not appear here, even if they were approved to count towards an area in the past, if they have not been taught in recent years. They may appear in gray if future offerings are in doubt.

Analytics
There is a minor in Analytics, but no major.
