OFFICE OF UNDERGRADUATE ENGINEERING

STUDY ABROAD CHECK LIST FOR MCCORMICK STUDENTS

BEFORE YOU APPLY TO STUDY ABROAD:

Congratulations on deciding to Study Abroad! We have every confidence in you that you will represent us well during your time studying internationally. Northwestern offers a wide variety of study abroad options that cater to a broad set of interests and goals. Where you go will ultimately depend on the type of experience you feel will fit you best.

1. If you have not already done so, you should explore program information available through Global Learning Office www.northwestern.edu/abroad and be sure that you understand the requirements through their office. You can also find study abroad resources through Engineering’s Global Initiatives page www.mccormick.northwestern.edu/global. Explore the student opportunities page and be sure to review the Engineering Abroad Documents section for an Engineering Abroad Programs list and Engineering Abroad Fellowships and Scholarships information. Exploring these sites will help you narrow down the many study abroad options to first and second choice programs that best meet your goals.

2. Review the “Detailed Instructions” for transferring course credit on the following pages. Transfer credits earned for engineering/math/science credits are ONLY guaranteed to apply toward degree requirements when you have filed the curriculum petition prior to departing on your study abroad program. Petitions are to be submitted at the time of application.

3. Once you are ready to formally begin the application process, raise your hand in ConnectNU as per GLO instructions to start the School Advisor Approval process with Ashley Silverstein.

4. Communicate with Ashley Silverstein via email at ashley.silverstein@northwestern.edu, so that your study plan within MAS can be updated to reflect your intent to go abroad. If you have questions after reviewing the petition instructions, please also include those in your email.

5. Meet with your faculty advisor, make sure the curriculum you intend to take will allow you to complete your engineering degree in a timely manner. During this meeting, your faculty advisor should approve your MAS study plan for the quarter you intend to return to Northwestern. (Ex: If you intend to study abroad in fall quarter you will need an approved study plan for winter quarter.) Note: If you are studying abroad in the summer, you may skip this step. You should also discuss and begin the petition process for your technical credits during this meeting.

6. Once your petitions have received departmental and adviser approval, and your adviser has signed off on your study plan, contact ashley.silverstein@northwestern.edu.

7. McCormick students, the GLO application will include a step asking you to include confirmation that you’ve discussed your study abroad plans with your major/minor adviser. You will upload the ConnectNU resolved flag email from Ashley. If you hope to apply study abroad credit to progress in a minor, you should have an additional conversation with the adviser for that program.
DETAILED INSTRUCTIONS:

Course credit

Only the School of Engineering has the authority to approve transfer credits to satisfy your engineering degree requirements. You must, therefore, file a curriculum petition for all course work you wish to apply toward degree requirements.

Before Going Abroad

Timeline:
This process can be lengthy. Please allow at least seven business days for a response when reaching out to evaluators, faculty advisors, and undergraduate department program chairs.

Technical Credits

All engineering, math, and science courses must be approved by petition in order to have your first-choice program application approved for study abroad. *Transfer credit is not guaranteed until petitions are approved. In addition to petitioning the first-choice courses you intend to take; you should petition back-up courses to prepare for the common scenario in which you cannot register for your first choice courses. Inability to register for first-choice courses does not exempt you from the rule that technical courses must be approved prior to departure, so these back-up courses are particularly important.

Classes towards the computer science 300 advanced electives must be petitioned prior to studying abroad via email from the department of the course. A preliminary review of the course by the department must be submitted with your petition form.

A petition form is included at the end of this document. In addition to the form, you will need a syllabus written in English for the course in order for content to be reviewed. To help the content be reviewed, please provide information about any prerequisite for the courses to the departments, as well as a class schedule.

There are three signatures that must be obtained before a petition will be accepted by the Undergraduate Engineering Office as part of the study abroad application. These signatures must be obtained from:

1. The instructor who teaches the course for which you are seeking equivalency OR the undergraduate approver for the department in which the course is offered. For example, if you are seeking credit for ME 222, you must obtain a signature from a faculty member who teaches ME 222 or the undergraduate department approver of ME. If you are seeking generic credit, such as COMP_SCI 2XX, the undergraduate department approver is a good person to contact for this signature.
2. Your McCormick faculty adviser.
3. The undergraduate department approver for your program.

* If you are applying to a competitive program and end up enrolling in your second-choice program, the petitions need to be submitted prior to departure.

Once all signatures are obtained, the petition should be submitted to ashley.silverstein@northwestern.edu during the McCormick approval meeting that is required within the study abroad application. If course information is not available at the time of application or if course plans are altered prior to departure signed petitions must be submitted BEFORE you depart for your study abroad program. Changes such as different course numbers require a new petition. Requests for course review cannot be made while you are on your study abroad program.
Non-Technical Credits
Courses outside of engineering, math, science, and your major 21 classes may be petitioned after your return to campus following study abroad. If you are taking non-technical courses for any second majors, minors, or certificates, it is important to verify the possibility of transferring planned courses back to those requirements prior to studying abroad. Those programs will have their own policies and procedures for counting transfer credits toward requirements.

While Abroad

Be sure to save the syllabus, list of required texts, and any other materials from each course you take abroad in case any follow-up is necessary upon your return to Northwestern. This is important for all courses including those you wish to transfer back for general credit (GEN_CRED 1XX)

After Returning from Abroad

Request that your official transcript be sent to Northwestern. The credit transfer process cannot take place until this transcript is received. Once your transfer credits are in MAS, you will need to get your classes re-articulated through the McCormick Undergraduate office. Theme classes will be petitioned directly in the theme portal.

Registration

Before Going Abroad

For students going abroad in fall, winter, or spring quarters, the study plan for your first quarter back at NU will be approved as part of your application process. This allows your advising hold to be released while you are abroad without an additional advising appointment. Students going on summer programs will register for fall classes in spring prior to departure and will return in time for the regular academic year so there is no interruption of the standard advising process that takes place each quarter.

While Abroad

You will register for the quarter in which you will return to NU using CAESAR during the regular registration period. This means that it is critical that you continue to check your NU email account and the Registrar’s Office website for updates on registration dates and appointments. It is also strongly recommended that you check CAESAR for any registration holds prior to your appointment time. Dealing with registration holds from abroad can be time consuming so it is important to be aware of these in advance. If you encounter issues registering via CAESAR while abroad, you should contact a member of the Undergraduate Engineering Office.

After Returning from Abroad

Since you will register along with all other NU students during the university registration period, the registration process should be complete by the time you return from study abroad and no action should be required.

Honors and Scholarships

If you are interested in pursuing honors work in your major, you should be sure to discuss this with your department before you go abroad. Many honors programs require application at the end of the junior or beginning of the senior year. The same is true if you might want to apply for various national scholarships such as Rhodes or Marshall when you return, which have deadlines early in fall quarter. Scholarship information is available from the Office of Fellowships, 1940 Sheridan Rd., http://www.northwestern.edu/fellowships/.
Department Approver for Study Abroad Petitions
Please contact these professors for approval for course that want to be transferred within these departments:

McCormick Courses:

Applied Math: Prof. Hermann Riecke
Biomedical Engineering: Prof. Suzanne Olds
Chemical Engineering: Prof. Jennifer Cole
Civil Engineering: Prof. Eric Garcia
Computer Engineering: Prof. Russell Joseph
Computer Science: study-abroad@cs.northwestern.edu
Electrical Engineering: Prof. Ying Wu
Environmental Engineering: Prof. J.F Gaillard
Industrial Engineering: Prof. Jill Wilson
MaDE: Prof. David Gatchell
Mechanical Engineering: Prof. Manohar Kulkarni

Math and Science:
Math: dus-math@northwestern.edu
Biology: Biosci@northwestern.edu
Chemistry: chemhelp@u.northwestern.edu
Physics: Professor Deborah Brown
PETITION FOR TRANSFER OF STUDY ABROAD CREDIT

This form is to be used for equivalency verification for credits taken by Engineering undergraduates on study abroad programs. Syllabi written in English must be provided for courses to be reviewed for equivalency. Submit forms to ashley.silverstein@northwestern.edu or in office in Tech. L269. Email is preferred.

Name ______________________________ Major __________________________ Date _____________

NU Email ____________________________ @u.northwestern.edu Phone ___________________

Expected Graduation Date (Quarter) __________________________ (Year) ____________ Student ID __________________

Student Signature __________________________

Approval of Course Transfer and Application to Degree Requirements
To be completed by adviser and departmental undergraduate approver.
