# GLOBAL ENGINEERING TREKS (GET)

Germany | Israel | Taiwan

McCormick Global Initiatives has created several non-credit, global 10-day field-immersion programs for undergraduate students. In these programs, students will visit global companies, start-ups and incubators, research institutes, and universities. While learning about the global aspects of the field specific to each GET program —sustainability, water, innovation, and high-tech— students will also gain exposure to global internship, research, and job opportunities. Trips to cultural, historical, and archaeological sites are also included in the programs.

## TREKS ARE OPEN TO ALL MAJORS
