

John Jurewicz

OVERVIEW

As the director of his architecture firm, A Architects, Mr. Jurewicz has twenty years of experience, specifically in technology, implementation of extranets and e-commerce. Prior to establishing his practice, he worked as a director of technology for the design build firms of McCLIER, in downtown Chicago and POWER CONSTRUCTION & ENGINEERING, in Schaumburg, IL. Currently on display in at the Computers for construction show in Las Vegas, John is credited for designing and building the first CADMobile, a prototypical wireless office with wide format printing capability; a virtual architect's office that can be placed onsite, anywhere in the world with broadband connection to the internet.
